Limited Flake Selections

Eligibility Requirements include but are not limited to: location, existing conditions, availability and site conditions.

Concrafted Garage Floor Flash Sale — What to Expect

1. Tell Us About Your Garage

- Complete our online [Garage Floor Flash Sale](#) form.
- We'll ask for basic information including your address, approximate garage dimensions, current condition of the concrete, and several clear photos of the garage floor.
- Please make sure your photos show the **entire floor**, as well as any cracks, existing coatings, stem walls, stairs or other unusual areas.

2. We'll Review Your Garage

- A member of the Concrafted team will review your information and photos within **24 business hours**.
- We'll first determine whether your garage qualifies for the Flash Sale. Eligibility is based on location, garage size and configuration, concrete condition, required preparation and our available installation schedule.

Not every garage will qualify for Flash Sale pricing.

Limited Flake Selections

Eligibility Requirements include but are not limited to: location, existing conditions, availability and site conditions.

3. Receive Your Initial Price

- If your garage qualifies, we'll send you an **initial project price based on the information and photos you provided**.
- The Flash Sale price includes the standard floor preparation and coating system outlined in your proposal.
- Some conditions may result in additional costs, including extensive concrete repairs, existing coating removal, moisture conditions requiring a vapor barrier, stem walls, stairs or unusual obstacles.
- Any known additional work identified from your photos will be included in your initial price whenever possible.

4. Reserve Your Installation

- If you'd like to move forward, we will schedule a time to come out, place a vapor barrier test and pick flake colors. The next day, we will return to collect the test and finalize our proposal and schedule an installation date. Please reserve (2) days for us to complete our work.
- Because this is a limited Flash Sale designed to fill specific openings in our schedule, installation dates are available on a first-confirmed basis.

5. Prepare Your Garage

- Before Concrafted arrives, the garage must be **completely empty**.
- That means vehicles, shelving that isn't permanently attached, tools, storage containers, appliances and other personal belongings must be removed from the work area.
- If the garage isn't ready when the crew arrives, the project may need to be rescheduled and could lose its Flash Sale eligibility.

6. Day One — Preparation & Installation

- Our crew will mechanically grind the concrete and patch any holes.
- We'll honor existing control joints rather than simply coating over them.
- If our preparation exposes a **significant concealed condition that could not reasonably be identified from the photographs**, we'll discuss it with you before performing additional chargeable work.

7. Day Two — Complete the System

- We'll complete the remaining steps of your full-flake flooring system and provide instructions regarding when the floor can accept foot traffic, vehicles and normal garage use.

8. Payment

- Payment is expected at time of completion. Checks and credit cards are accepted. An invoice will be emailed to you the morning of your final installation day.
